

2.2 String Literals

Literal: A value you put in a program

Examples: "Hello" } String Literals
"132" }

15 } Integer Literals
122 }

23.2 } Floating point literals
14.0 }

Print vs. println

println starts a new line after it prints the text

Escape Sequences

\" → prints a \"

\\ → prints a \

\n → prints a new line

\t → prints a tab

The + operator

- If either operand is a string, then the result is a string (concatenation)
- If both operands are numbers, then the result is a number (numeric addition)
